

Machine Learning for Natural Language Understanding

Prof. Achim Rettinger

Neural Nets

Lecture 03

Sources Lecture and Exercise

- Logistic Regression
 - <https://youtu.be/nUdiu96sWmE>
- Perceptron, Artificial Neural Networks, Backprop, Regularization
 - <https://youtu.be/QDX-1M5Nj7s?si=XWMX3af03WvX2M0b&t=888>

Flipped Classroom Questions

- Why is the quadratic loss not ideal for binary classification?
- How is the output of an artificial neuron (perceptron) calculated?
- What are the benefits of using several neurons in an artificial neural net?
- Name two options to reduce the risk of overfitting.

“The future of language is about the development of language models...”¹
