

Machine Learning for Natural Language Understanding

Prof. Achim Rettinger

A wide-angle photograph of the Stonehenge monument in England. The large, grey, moss-covered stone structures are arranged in their characteristic circular formation on a green grassy field. Several people are visible walking around the base of the stones, providing a sense of scale. The sky is a clear, pale blue with a few wispy clouds. The overall scene is peaceful and historic.

Static Word Vectors

Lecture 04

Sources Lecture and Exercise

- Embeddings (Word2Vec)
 - <https://youtu.be/rmVRLeJRkl4?feature=shared&t=854> (to 39:59)
- Details of Word2Vec
 - <https://youtu.be/gqaHkPEZAew?feature=shared&t=826> (to 22:55)

Extra:

- Vector Representations of Words (before embeddings)
 - <https://youtu.be/ladnEWOntEM>

Flipped Classroom Questions

- What is “distributional semantics” about?
- Name a distributional representation of words that is not learned by machine learning.
- What is the input and output dimensions of the word2vec model?
- What is a softmax?

“The future of language is about the development of language models...”¹
